AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of draft permit modifications.

SUMMARY: The U.S. Environmental Protection Agency (EPA) is issuing for comment draft modifications to the sulfur dioxide (SO₂) compliance plans of two previously issued final Phase I Acid Rain Permits in accordance with the Acid Rain Program regulations (40 CFR part 72).

DATES: Comments on the draft modifications must be received no later than 30 days after the date of this notice or the date of publication of a similar notice in a local newspaper, whichever is later.

Submit comments in duplicate and identify the permit to which the comments apply, the commenter's name, address, and telephone number, and the commenter's interest in the matter and affiliation, if any, to the owners and operators of all units in the plan. All timely comments will be considered, except those pertaining to standard provisions under 40 CFR 72.9 or issues not relevant to the permit.

In today's action, EPA is issuing, for public comment, draft modifications to existing permits, allocating SO₂ emission allowances and approving SO₂ compliance plans, to the following utility plants:

Baldwin in Illinois: one substitution plan for 1995-1999, in which unit 3 designates Havana units 1, 2, 3, 4, 5, 6, 7, and 8 as substitution units.

Waste Analysis Guidance Manual: The Resource Conservation and Recovery Act (RCRA)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of availability of Waste Analysis Guidance For Facilities That Burn Hazardous Wastes—Draft.

SUMMARY: The Environmental Protection Agency announces a draft Waste Analysis Guidance For Facilities That Burn Hazardous Wastes for public comment. This guidance document was developed by the Office of Compliance for facilities that treat and dispose of hazardous wastes by using combustion technology as regulated under 40 CFR parts 264 and 265, subpart O and 40 CFR part 266, subpart H. RCRA was designed to ensure that the generation, transportation, treatment, storage and disposal of hazardous wastes are conducted in a manner that "protects human health and the environment." The cornerstone of the program is the ability of facility personnel to properly characterize and identify their wastes. This guidance manual is designed to assist the regulated community, permit writers and enforcement officials by establishing recommended criteria to properly develop and evaluate RCRA waste analysis plans at combustion facilities. The Agency is specifically soliciting comment on the use of process knowledge to determine feed rates of constituents in the absence of analytical data, and the use of statistical analysis in establishing feed rate limits.

DATES: EPA will accept public comments on this draft guidance document until May 11, 1995.

ADDRESSES: The public must send an original and two copies of their comments to: RCRA Information Center (5305), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460. Copies of the Waste Analysis Guidance For Facilities That Burn Hazardous Wastes EPA/530/R-94/019 may be obtained by visiting the RCRA
